COSYS Supply Chain Management

COSYS Package Management

COSYS complete solution - Advantages/Facts

- COSYS Software:
    - diverse application possibilities with the latest technologies (including cloud and use of smartphones with COSYS Performance scanning via the device camera)
    - Manufacturer-, device- and technology-independent
    - flexible framework (to dynamically add more processes before or after)
    - specific adaptation possibilities of the COSYS software to the individual customer process
    - COSYS WebDesk (browser-based post-processing and administration software) with modern design, features and functions
    - Various connection options and interfaces to other customer systems

- COSYS also offers an extensive range of hardware services for:
    1. Hardware sale (new/used)
    2. Service & repair, hardware-related services
    3. Hardware rental
    4. Concept development for taking back old equipment

    and tailored service and maintenance contracts for the complete system supplied.
